Certificate III in Drilling Operations is recommended for personnel ranging from Trainee Drillers to Senior Drillers. Certificate III in Drilling Operations is a comprehensive course which has been developed in conjunction with industry experts and is Nationally Recognised. Listed below are some key skills that will be acquired in completion of this qualification:

- plan, set up, prepare and conduct drilling operations
- locate the rig at hole position
- select and use drilling additives
- take samples
- perform pre-start checks
- carry out maintenance and equipment checks
- ability to maintain tools and perform equipment maintenance and field repairs
- maintain operating records
- able to give clear individual and group instruction and demonstrate work skills
- ensure occupational health and safety requirements are adhered to within the drilling team
- identify hazards
- assess and identify unacceptable risk and recommend treatments
- review safety system documentation

The following units are completed as part of this qualification:
